

Sea Foods

Fishing

Karachi's Hub of main fishing activity in Pakistan it has to major harbors of the country and all most entire sea food processing industry is based in Karachi. Karachi fish harbor caters to the need more than 10,000 fishing boats of various categories and about 80% of the country sea food landings are routed through this harbor.

The need of flake ice plant of 200 ton capacity may be established on the landing jetty in addition a sea food processing plant of about 25 metric tons per frizzling capacity is needed.

However, no fishing implements are produced locally like fishing nets twine, good quality floats, ropes, machinery and engines are all imported from south east and Fareast Asian countries. Most engines are Japanese, fishing nets, netting panels, twine and floats are imported from Korea and China it is the dire need to establish the net and fishing gears manufacturing plants.

The local fisherman is practicing traditional old method of handling and transportation of fish and shrimps in wicker basket. It has been recommended that plastic fish craters / basket manufacturing plant for hygienic handling as per European Union standard is needed
