2.183	Sewage treatment is the multistage process that renovates wastewater (Figure 1) before the water or is reused on the land through irrigation. The goal is to reduce or remove the polluta organisms. Each receiving body of water has limits on the amount of pollutants it can safely a	nts and kill disease-causing
2.184	Therefore, each sewage treatment plant must hold a permit listing the allowable levels of BOD5, suspended solids, E. coll and other pollutants it is allowed to discharge. The discharge permits are called NPDES (National Pollutant Discharge Elimination System) permits.	
2.185	Environment Protection Drainage Preliminary Treatment	
2.186	Screening, grinding and separating large solids and debris from wastewater is the first stage in Sticks, rags, large food particles, sand, gravel and even toys that are flushed down the drain m wastewater to protect pumps and other wastewater treatment equipment. Preliminary treatm screens, comminutors (larger versions of garbage disposals) and grit chambers. The collected of in a landfill.	ust be removed from ent equipment includes bar
2.187	Environment Protection Drainage Primary Treatment :	
2.188	Ouiet tanks are used to settle out solids and separate grease from wastewater in the second st Wastewater is held in large tanks for several hours, allowing heavy particles to sink to the botto the top.	
. 2.189	Solids are drawn off the bottom, and grease is skimmed off the top and sent on to be treated a wastewater flows on to the next stage of wastewater treatment. Clariflers and septic tanks are primary treatment.	
2.190	Environment Protection Drainage Secondary Treatment :	
2.191	Microorganisms are mixed with wastewater to provide the biological treatment of wastewater. microorganisms are cultivated and feed on the pollutants in the wastewater. Organic matter is transformed to nitrate during secondary treatment. Three approaches are used to accomplish suspended film, fixed film and lagoon systems.	consumed and ammonia is
2.192	Environment Protection Drainage SUSPENDED FILM SYSTEMS	
2.193	Wastewater is stirred and aerated with microorganisms in suspended film treatment. The clarific cloudy as microorganisms are poured into the sewage. For several hours, mixers and aerators st mixture as the organic matter and ammonia is consumed.	
2.194	Next, the microorganisms are removed from the wastewater by letting the mixture flow to a set sink to the tank bottom, are collected and are returned to the mixing tank. The clear, treated was tank to the next stage of treatment. Suspended film systems are called activated sludge, extended the next stage of treatment.	astewater flows out of the
2.195	Environment Protection Drainage FIXED FILM SYSTEMS:

	Etc.	Etc.
	Wastewater is sprayed over rocks, sand or even pieces of plastic that are covered with a thin	film of microorganisms. As
	the wastewater flows over the microbial film, organic matter and ammonia are consumed. Fire	
2.196	trickling filters, sand bioreactors or rotating biological contactors in a fixed film system.	•
	, and the same and	
2.02	LACOON SYSTEMS.	
2.197	LAGOON SYSTEMS:	
	Large, shallow ponds collect and hold wastewater for months as naturally occurring microorg	ganisms consume the organic
2.198	matter and stabilize the wastewater. Lagoon systems may be naturally aerated or be equippe	
2.176	to gently stir the wastewater to ensure good contact between the microorganisms and the p	ollutants.
2.199	Environment Protection Drainage Advanced Treatment :	
	Chemicals added to the wastewater or extra treatment processes are sometimes added to set	
7.700	phosphorus or nitrogen from wastewater. Chemicals called coagulants can help bind up and	
2.200	stripping, pH adjustment or aerobic/anaerobic treatment processes are sometimes used to rer	nove nitrogen from
	wastewater.	
2.201	Environment Protection Drainage Final Treatment:	
	Killing disease-causing organisms is the last stage of wastewater treatment. Chlorine is an effe	ctive disinfectant and will kill
	disease-causing organisms with enough time. Treatment plants will have baffled tanks to prov	ride the contact time needed
2.202	for the chlorine to complete the disinfection process. Because chlorine is toxic to aquatic life, t	the chlorine must then be
2.202	neutralized before being discharged into a body of water. Ultraviolet light is also used in treat	ment plants for disinfection.
2.203	Environment Protection Drainage Sludge Treatment (Also Called Biosolids):	· · ·
	Studge contains the pollutants removed in the wastewater treatment process. Primary studge in	-
2.204	collected in primary treatment. The extra microorganisms grown during secondary treatment	
	considered secondary sludge. Precipitates of phosphorus and other pollutants generated during	ng advanced treatment are
	also sludge.	Α
4	The sludge treatment is to stabilize it to reduce odor; remove water to reduce volume; and disi	infect it to kill disease-
2.205	causing organisms. Once treated, sludge is recycled through land application to reuse the organisms.	· ·
2.203	captured during wastewater treatment to amend soil.	
	Since untreated sludge is about 97 percent water, much of sludge treatment involves separati	ng the water from the solids.
2.206	Settlers, filters, dryers, presses and centrifuges are all used to reduce the water content of slud	
· · ·	To stabilize to reduce odors, sludge is digested either by aerating it for many days or by digest	ing it for a few months in
	anaerobic digesters that produce methane gas. To disinfect sludge to kill disease-causing orga	nisms, caustic chemicals
2.207	added (like lime), or the sludge is heated.	cricinicals are

2.211	Environment Protection Drainage Wastewater Treatment Regulations;	· · · · · · · · · · · · · · · · · · ·
	Clean water has been a concern nationwide since the early 1970s. In 2017, Sindh Governmen	nt Make Act to Control
	Environment in Sindh Province Through this law, the Sindh. SEPA and corresponding state ag	
2.212		
	responsibility to regulate activities that threaten the nation's water resources.	
	In the Federal Water Pollution Control Act, U.S. Congress adopted comprehensive water police	y for the nation and set a
2.213	national goal to eliminate the discharge of pollution to navigable waters. To reach the goal, L	
	regulatory framework:	
	No one has the right to pollute the navigable waters of the Sindh Province including Karachi	and its surrouding Arbian
2.214	Sea areas . Dischargers must have a permit to pollute.	,
2.215	Permits set pollutant limits, and a violation carries a penalty of fines or imprisonment.	
2.216	The permits expire and must be renewed every 03 years.	
	Director Environment, MS, KMC Shall Issues permits and enforces these by-laws as well as SEPA	Sindh Government Act, Two
	permits are required for most systems. The first is a Permit to Installation from SEPA & Seconder	ry From KMC Environment
2.217	Department , which needs to be obtained before the planned system can be constructed.	
	The second is a discharge permit (Environment Department KMC permit) that lists all of the p	ollutant discharge limits.
	KMC permits must be renewed and include more restrictions every 03 years as the nation con	
2.218		
	goal of eliminating the discharge of pollutants to navigable waters.	
	However, small systems that treat wastewater onsite and do not have a discharge are permitt	ed by local health
	departments under regulations adopted by the Ohio Department of Health. Local health dep	
	onsite systems serving one-, two- or three-family dwellings. The SEPA and KMC Environment D	
2.219		
2.217	regulate small discharging systems. They also work together to regulate nonresidential system	is that treat up to 1,000
	gallons of wastewater per day.	2
	Penalties for violating water pollution laws range from a public nuisance to an illegal discharg	
	created by the discharge of raw sewage from a building. It is a third-degree misdemeanor pu	nishable under laws or a
2.220	fine, plus the requirement to remove the sewage and abate the nulsance.	
9.	<u> </u>	· · · · · · · · · · · · · · · · · · ·

FINAL SANCTIONED REVISED TAX SCHEDULE-V, PART-I(A) (See sections 96(1), Read With Section 103(1,2)) DETAIL/ DESCRIPTION OF SANCTION APROVED REVISED TAXES, RATES, TOLLS, FEES, CHARGE SANTIONED RATES PARKING, CESS, RENT, LEASE RATES AND FINES, PENALTIES ETC. WITH THEIR COLLECTION BYLAWS S.No Etc. An illegal discharge is a discharge to a waterway without a permit or a discharge to a waterway that exceeds the limits of the permit. An illegal discharge carries a fine with each day being a separate violation for civil penalties. If an illegal 2.221 discharge is found to be a criminal violation, the penalty will be imposed as per law. SEPA Or KMC Environment Department can also issue a "connection ban" that prohibits the construction of any further homes or businesses if the pollution is being discharged to the waters of the Karachi Sindh. 2.222 By regulating the discharge of pollutants to KMC's waterways, streams, Layari, Mailr Nadi, Storm water Drainage etc. and lakes are cleaner; water supplies and recreational waters are protected; and fish and other wildlife can flourish. 2.223 Any error or omission in the specification printing, item will be governed by the relevant specification, rules & schedule of 2.224 rates.
